Content After Snaking Columns

This text correctly appears after the snaking columns section, demonstrating that the layout engine properly tracks the bottom position of content spanning multiple columns.

Comparison: Regular Columns

Without snakingColumns, each column is independent. Content in column 1 stays in column 1, and content in column 2 stays in column 2.

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. This is separate content in column 2. It does not receive overflow from column 1.

Snaking Columns with Different Widths

Example 1: Narrow Left Column (200pt) + Wide Right Column (*)

Content starts in the narrow column and overflows to the wider column.
