

Snaking Columns with keepWithHeaderRows

This example demonstrates `keepWithHeaderRows` inside snaking columns. Compared with the baseline `headerRows` example, this one uses variable/taller rows so the effect is visible. When there is not enough room for the header plus kept rows, flow moves earlier to the next column/page.

ID	Item Description	Qty
1	Item description for row 1	8
2	Item description for row 2	15
3	Item description for row 3	22
4	Item description for row 4	29
