Text decoration fixes

1. Largest font in a decoration group

The decoration uses the largest font in each group, regardless of the order of the text fragments. Compare the position and thickness in each pair below.

underline

Largest font first

30 pt 20 pt 10 pt

Largest font last

10 pt 20 pt 30 pt

overline

Largest font first

30 pt 20 pt 10 pt

Largest font last

10 pt 20 pt 30 pt

lineThrough

Largest font first

30 pt 20 pt 10 pt

Largest font last

10 pt 20 pt 30 pt

2. Different decoration thicknesses

Adjacent fragments have the same font, decoration style and color. Only decorationThickness changes. Each fragment should retain its own thickness instead of inheriting the first one.

underline

Thin (1 pt) Thick (3 pt) Thin (1 pt)

overline

Thin (1 pt) Thick (3 pt) Thin (1 pt)

lineThrough

Thin (1 pt) Thick (3 pt) Thin (1 pt)

Explicit thickness and automatic thickness

Explicit 3 pt Automatic Explicit 1 pt

3. Wavy decorations and clipping

Identical samples appear near the top, middle and bottom of the page. The wave clipping height is always 2 pt (1 pt above and below its center), independent of the vertical position. Its width follows the decorated text.

Sample at y = 150 pt

Underline Overline Strike

Sample at y = 380 pt

Underline Overline Strike

Sample at y = 640 pt

Underline Overline Strike
